

# Assembly Guide

## TIPS

- To detach the parts from the board, press the anchor point with your thumb.
- Always push with your thumb on the engraved side of the board, so the piece falls under the board.
- You can easily locate the anchors points by looking at the back of the board.
- Use PVA glue diluted with a little water. (3 parts adhesive, 1 part of water).
- Use a small file to remove the anchor points' residues. You can also use a modeler's knife (handle it carefully to prevent injury).
- Use a small brush to spread the diluted glue.
