

## PRODUCT SHEET: MOKI MITTEN

### COMFORT ZONE

Use down to -20 °C.

### DESCRIPTION

Warm and comfortable the MOKI mittens have a stretch fleece extension that covers baby's wrist and the beginning of their forearm. The extension of fleece and elastic wrist allows the MOKI mitten to remain firmly in place on baby's hand.

Since the mitten does not have a thumb, it is easier to put on and keep all fingers together to stay warm. In addition, the glove is ideal for baby's chubby hand as it has a gusset giving it a wider thickness.

The exterior of the mitten is made of waterproof nylon and is windproof. The fleece lining makes the mitten warm and cozy. A thin layer of insulation, Powderfill™ traps in the heat and promotes a healthy evacuation of moisture. **Comfortable for temperature down to -20 °C.** Dress your child appropriately according to the weather.

### USE

The MOKI baby mitten can be used for cooler fall and spring weather as well as the winter season.

**Parents, be vigilant, your child may have a greater sensitivity to cold.**

Baby can wear these mittens when in they are in the stroller, in the baby carrier or in the car seat. You'll love their design, easy to put on and the wrists are covered to stop the snow from entering the mitten.

### TIPS

The suggested temperature for our products is indicative. Different criteria vary the comfort zone: physical condition, humidity, food, fatigue, shelter, altitude, etc. Adapt your Sherpa product to the activity you plan to do.
