

PRODUCT SHEET : ADULT MOUFLON

COMFORT ZONE

Use down to -15 °C.

DESCRIPTION

Light, warm and compressible. These mouflons are insulated with synthetic wad which traps the heat and helps the evacuation of moisture. Removable insoles facilitate maintenance. The mouflons adjust with two adjustment cords. Non-slip outsoles are flexible and durable. **Comfortable by temperature down to -15°C; be careful: you may be more sensitive to cold.**

USE

The puffy slippers for the feet! These mouflons are made of moisture-wicking materials to keep your feet warm. Ideal for winter camping, a night in a shelter or at the cottage, these indoor slippers are extra hot for the chilly feet! We suggest you limit the use on abrasive surfaces, such as concrete or asphalt, so as not to prematurely wear the sole.

TIPS

Made from lightweight and windproof nylon, the adult Sherpa mouflon is designed to go outdoors and even in the snow. However, it cannot be considered waterproof like a rain boot or winter boot, nor adequate for a long walk in the snow.

The suggested temperature for our products is indicative. Different criteria vary the comfort zone: the physical condition, the humidity level, the food, the fatigue, the shelter, the altitude, etc. Adapt your Sherpa product to the activity you plan to do.

SIZE

What size to choose? Check the table below to guide you to the correct size. .
